EDUCATION

Lyceum of the Philippines University Cavite (LPU-C)

August, 2025

B.S. Computer Science

General Trias City, Cavite

Awards/Honors: Dean's List, Best in Thesis Candidate

Relevant Coursework: Web Development, Front-End Development, UI/UX Design, Machine Learning, Database Management

INTERNSHIP

Front-End Engineer

300 hrs | July – August 2024

Leentech Network Solutions

General Trias City, Cavite

- Delivered 90% of front-end development for a US-based web job portal, building responsive and cross-device-compatible pages using modern web technologies.
- Led UI/UX design for the entire job portal, independently creating and refining all interface layouts to meet client expectations and user-centered design standards.
- Completed and successfully pitched the fully functional website to a US-based client within a 1-month+ timeline, collaborating with the team from design to final delivery.

EXPERIENCE

Customer Service Representative

September 2025 – February 2026

Alorica MOA (ABB)

Pasay City, Metro Manila

- Managed healthcare data and over-the-counter item requests for members under Aetna, ensuring accurate handling of personal and medical information across 5 months of contract duration.
- Delivered 100% contract completion, consistently fulfilling all assigned tasks and maintaining service quality standards in a fast-paced healthcare account environment.

PROJECTS

PORTFOLIO LINK: <https://thegr8ranniel.vercel.app/>

ReadSpeak | React, Python, PostgreSQL, Supabase, Wav2Vec2phoneme, AWS | Best in Thesis Candidate

- Led a team of 3 as Project Leader and Front-End Developer/UI-UX Designer, building an AI-powered reading pronunciation analyzer for primary students using the Wav2Vec2Phoneme algorithm, achieving a **95% accuracy rate** across 30 student participants.
- Developed an interactive platform featuring real-time pronunciation analysis and a quiz module to assess reading comprehension, delivering a complete end-to-end learning tool.
- Nominated as Best in Thesis at Lyceum of the Philippines University – Cavite and published and presented internationally in Japan as a recognized innovative academic project.

RA 7166 Expert System | HTML, CSS, JavaScript, Tailwind CSS

- Built interactive web demos using Google's Teachable Machine to showcase real-time image and sound classification in the browser.
- Enabled users to train custom machine learning models without any coding expertise, making AI accessible through a user-friendly interface.

Leo AI Chatbot | HTML, CSS, JavaScript, Bootstrap, Python, Gemini API

- Developed an expert system providing legal insights and guidance on electoral reforms under RA 7166, covering synchronized national and local elections in the Philippines.
- Designed an intuitive interface presenting structured legal information by section, helping users understand election campaign rules and compliance guidelines.
